## Secure CPU Holders

### CPH-51S Security CPU Holder

The CPH-51S is designed to secure the CPU to the desk and yet have full and complete access to your computer. The CPH-51S is simple to assemble and install and can be adjusted for virtually all the common CPU's sold today. The unit is designed to hang a tower style CPU from any horizontal surface. Alternatively, the unit can be bolted to the floor. All adjustments must be accessed from inside the unit. Customer supplies the padlock.
